

Jack that Crack!

Our concrete leveling professionals can repair and prevent damage caused by sunken, uneven concrete. It's cheaper and faster than replacement!

Sunken, uneven concrete is unattractive and potentially dangerous. It's a safety hazard on your property that can lead to a trip and fall, and it can also cause damage by creating drainage problems. Removing and replacing sunken, uneven concrete can be time-consuming and very expensive.

Advantages of Mud Jacking

- No need to remove existing concrete.
- Costs only 25 – 50% of concrete replacement.
- Can be done in one day while replacing concrete takes 4 or 5 days.
- Concrete gets harder as it ages, so your old concrete is stronger than new concrete.
- Very little, or no damage to your landscaping; sod will remain in place.
- You can use the repaired area in as little as 4 to 6 hours, even for vehicular traffic.
- Unlike new concrete work, mud jacking work is not affected by the weather.
- No need to worry about new concrete matching the old concrete.

Why Use CanWest Concrete for Mud Jacking?

- CanWest knows concrete! We have over 25 years of experience on residential, commercial and industrial projects. You can trust our concrete and mud jacking experts to complete your project successfully, and to your satisfaction.

Over time, driveways, sidewalks, walkways, and patios can become unsafe and a tripping hazard. Alberta Mudjack can restore your driveway to its original state, saving you thousands of dollars in replacement costs. As well, it only takes one day and doesn't cause any damage to existing landscaping and concrete.

Where Can You Use Mud Jacking?

Concrete leveling can be used in any sunken, uneven area:

- Patios and porches
- Pool decks
- Sidewalks
- Walkways
- Driveways
- Garage floors
- Basement floors
- Stairs and steps
- Warehouse floors
- Commercial and industrial floors

Alberta Mudjack Industries Inc. can level your sidewalk, preventing a tripping hazard.

Other Services:

- Basement window installation
- Basement window enlargement
- Excavation
- Saw cutting
- Concrete crack repair
- Concrete removal & new concrete
- Core drilling
