Please Forward this information to all Managers, Estimators & Site Superintendents

## CONCRETE, ASPHALT & FIBRE OPTIC TRENCHING

- **Why Use a Vermeer Trencher?**
- Easier to remove trench when excavating (no binding on sidewall – **less cave ins**)
- Re-use all material for back filling (if required)
- No need to pay for water slurry vacuum clean up and disposal fees
- No longer need to do 2 cuts for small trenches
- Concrete cutting & Excavation are complete in one (1) pass (on small trenches)
- 3 times the speed of saw cutting – resulting in less lane closure time
- Cut flush to curbs and barriers within 4”
- Fibre optic line installation – easy & cost effective
- Able to trench even in frozen ground or bedrock
  
- **Width & Depth of Cut Capacity**
  - ¾ “ wide by 12” depth
  - 1 ¼” wide by 18” depth
  - 3” wide by 12” depth
  - 4” – 10” wide by 31” depth
  - 4” wide by 15” depth (rough terrain)

**Also available, Electric Compact Excavator**  
Width 12” to 18” up to 72” depth  
Fits into tight spaces  
No more hand digging  
Variety of attachments and  
allows **FUMELESS** trenching for indoor  
applications
